

Quality Improvement Plan (QIP)

Narrative for Health Care Organizations in Ontario

March 27, 2025

OVERVIEW

Extendicare Countryside is a brand new 256 bed long-term care home located in Sudbury, Ontario. On March 24th 2024 183 Resident transitioned from our previous Extendicare Falconbridge site to their new home at Extendicare Countryside.

Our Purpose, Mission, Vision and Values

In 2024, through broad consultation with stakeholders across our organization including direct engagement of residents, team members and family members of those in our care, Extendicare conducted a refresh of the Mission, Vision and Values. Our goals were to capture who we are, what we can all achieve working together and to put the feelings of communities into words.

Our Purpose is helping people live better.

Our Mission is to provide people with the care they need wherever they call home

Our Vision is a future where everyone in Canada has access to the care and support, they need to live their best lives.

Our Values:

We embrace every person for the individual they are.

We care for each person as we would our own family.

We collaborate with others because we achieve more together.

We are relentless in our efforts to improve.

We respect the resources entrusted to us.

In 2023, Revera's long-term care homes joined Extendicare. This has provided an opportunity to combine strengths, learn from one another, establish communities of practice focused on continuous improvement and collaboration, and reinforce Extendicare's deep commitment to long-term care in Canada.

Throughout our organization, integration work continues to be an important focus in 2025 and beyond. We know collaboration allows us to achieve more together. By aligning and standardizing processes, policies and systems across our homes, all Extendicare LTC homes will deliver consistent, quality care.

Extendicare's Quality Framework outlines the ways in which our home is supported to achieve success with a focus on quality of life, safety, regulatory compliance and resident engagement. In alignment with provincial requirements, each Extendicare home in the province is responsible for directing their quality improvement plan, with the support of a dedicated regional team who assist us with our home's quality initiatives. Our strategic direction and the initiatives that support the plan also meet or exceed standards set by Accreditation Canada and meet the requirements of our LSAA.

Our home's multidisciplinary Continuous Quality Improvement (CQI) Committee oversees our quality program. It is led by our home's CQI lead. Membership includes our home leadership team, each designated program lead, Medical Director, Dietitian, Pharmacy Consultant, resident and family council representatives, and care team representatives, including a Personal Support Worker and Registered Staff. Our CQI committee meets at a minimum quarterly and uses a CQI Framework in alignment with Extendicare's enterprise-wide strategic quality priorities to identify

key areas for quality improvement in our home, make recommendations, monitor and measure progress, identify and implement adjustments, and communicate improvement outcomes for the current and following year. Results are discussed and shared with residents, families, team members and external partners to support our priorities, targets, and activities.

Across our organization, Extendicare measures and monitors our quality initiatives using data accuracy and quality indicator results. Home-level quality reports are circulated monthly and reviewed by homes and regional teams across our network, to help monitor progress and drive meaningful conversation at each home's continuous quality committee meetings. Performance monitoring is a key part of our relentless efforts to improve performance and include but are not limited to the following:

Monitoring key quality indicators

Internal audits

External audits

Annual Program evaluations

Resident and Family Experience Survey results

Our homes multidisciplinary Continuous Quality Improvement Committee has determined that for 2025 our priority areas for quality improvement in our home will include Fall prevention, Pressure injury reduction, Antipsychotic deprescribing, Restraint reduction as well as the following areas from our Resident Experience survey as determined following consultation with our Resident and Family Councils: 1. Improving satisfied with the food and beverages served to me. 2. Improving satisfaction with the

variety of food and beverage options. 3. Improving input into the recreation programs available.

ACCESS AND FLOW

Extendicare is committed to working closely with our community partners including our regional Ontario Health at Home team, hospitals, and business partners to ensure safe, effective and high-quality care of residents across the organization and at the local home level. We do this through ongoing relationship building and partnerships with health system partners such as local long-term care homes, regional IPAC hubs, Ontario Health teams and various regulatory authorities.

In addition, our partnerships extend to our Medical Advisor, Attending Physicians and Nurse Practitioner as we work to improve medication management, clinical care and reduce unnecessary ED visits.

We work together with residents, their families and our health system partners to ensure safe, effective admissions to our home, and understand transitions throughout the system are not easy for those we serve. We work to apply additional care and attention to closely engage and support those in our care at times of change or at times where specialized supports are required in their health care journey.

Prevention and health promotion: Throughout the year, we support and participate in organization-wide awareness campaigns that educate team members, residents and families. Our home has access to an annual awareness calendar that highlights key health promotion and professional recognition events, which are

supported nationally through communication and education, and locally at our home with activities that are tailored to the home's needs and demographics. Organization-wide campaigns include:

Safe Spaces: Combining four key autumn safety awareness events – Infection Control Week, Canadian Patient Safety Week, Seniors' Safety Week, and Fall Prevention Month – Safe Spaces is a six-week sustained safety campaign. Aimed at promoting a culture of safety across the organization through education, resources and home-level activities, the campaign equips our team members with knowledge and tools to continuously improve quality and safety and engages residents and families as partners in care.

Stick it to the flu: Through Extendicare's annual influenza vaccination campaign, all homes are encouraged to aim for 90% vaccination of residents and staff. Individual and home-wide incentives are provided for achieving this benchmark, and our home hosts on-site vaccination clinics.

Hand Hygiene Day: Led by our IPAC team, this annual day is marked with an intensive focus on tools and education to promote proper hand hygiene practices for team members, residents and families. Homes across Extendicare participate in a friendly challenge to find the most creative and engaging ways to promote hand hygiene – from writing jingles to hosting events.

Alzheimer's awareness: We care for a population that is impacted by rising rates of Alzheimer's and dementia. In addition to intensive communication focus during Alzheimer's Awareness Month every January, our home has access to tools and education year-round that helps our team members to tailor care to the unique needs of

those living with dementia – from Gentle Persuasive Approaches (GPA) training to dementia-focused tools for skin and wound care.

Right care in the right place at the right time: On an ongoing basis, we work hard to support, train, retain and recruit qualified and compassionate team members to work together in the service of quality care for residents. We know strong interdisciplinary teams are essential to the delivery of quality care and we foster a culture of collaboration to contribute coordinated expertise, as resident plans of care are executed. In addition, we are actively recruiting Nurse Practitioners to support our collaborative models of care, continue to invest in building credentials among our team for advanced wound nurses (NSWOCS and SWAN's), provide training and resources for our team to enhance skillsets in IV therapy with multi-venous IV training arms, compassionate end-of-life care and more.

Building capacity: We recognize how important long-term care is within our health system. At an enterprise-wide level, Extendicare is actively working to increase access to care through the construction of new homes built to modern design standards with the ability to welcome more people on the province's long-term care waiting list. In communities across the province, Extendicare is building for the future, with plans to redevelop every older home in our network. New homes are designed to deliver significant improvements to resident quality of life, with private bedrooms for all, enhanced communal lounges for activities and family visits, increases in space for restorative therapies and more.

EQUITY AND INDIGENOUS HEALTH

Extendicare is committed to improving equitable access, experience

and outcomes to reduce health inequities and advance indigenous health across our organization.

At Extendicare, we embrace every resident for the individual they are, and care for them as we would our own family. Our Equity and Indigenous Health program reflects our core values by recognizing and honouring the diverse identities, cultures, and experiences of each resident. By integrating culturally appropriate care and Indigenous traditions, we affirm the importance of personal heritage in shaping well-being. Through culturally diverse programming, menu selection, staff education and meaningful community partnerships, we create a safe and inclusive environment where residents feel valued, respected and empowered to be their authentic selves. This commitment is essential to providing compassionate and equitable care.

Our Equity and Indigenous Health program is informed by our Resident Council and Family Council, and by the data we gather from our annual Resident and Family Experience Survey. Through partnerships with local Indigenous Elders, Knowledge Keepers, and regional health organizations we are able to integrate healing practices and culturally significant activities into care plans. Personalized support ensures residents feel seen, respected and connected to their heritage.

Implementing mandatory training on cultural safety, anti-racism, and the history of Indigenous Peoples in Canada for all staff, fosters awareness and equips caregivers with the skills to address systemic barriers and biases. Identifying and addressing systemic gaps in care, including access to interpreters, culturally appropriate meals and resources, and the provision of trauma-informed care, are skills

taught in staff training. Regularly assessing program outcomes through resident feedback, and staff input, helps us ensure continuous improvement

In 2025 we commit to continued support and recognition for diversity and inclusion for staff, residents and families in our home.

PATIENT/CLIENT/RESIDENT EXPERIENCE

Active engagement of residents and families is essential to our values. Annually, through an anonymous survey, we seek feedback from residents and their families about what is going well and what we can do to improve. The annual survey provides our home with a summary of the scores and comments for each of the areas of care and services offered. We use this report to collaborate with the residents and family councils to determine an action plan to improve the experiences of those we serve. On a regular basis during the year, we discuss progress updates and strategies for improvement via town halls, resident and family council meetings and newsletters.

Our ongoing goal is to incorporate feedback to continually improve the quality of care we provide by ensuring the care each resident receives is reflective of their individual needs and wishes.

Extendicare is proud to have a National REACH (Resident Experience Action Council for Homes) comprised of resident and family representatives from our long-term care homes in each province we serve. The council is co-led by resident and family members and provides valuable input on organizational initiatives and decisions. A head-office supported community of practice meeting is held bimonthly and is open to all residents and families interested in

sharing best practices and learning new ways to approach engagement, co-design, and council roles and responsibilities.

Our 2024 Resident and Family Experience Survey Results:

Date of 2024 Annual Resident and Family Experience Survey:
September 3rd 2024 to October 11th 2024

Resident: Would you recommend this home? 66.7%

Family: Would you recommend this home? 65 %

Survey results were shared and discussed with Resident Council:
February 18th

Survey results were shared and discussed with Family Council:
February 21st

A copy of the survey results was provided to Resident Council:
February 18th

A copy of the survey results was provided to Family Council:
February 21st

Survey results were posted on our bulletin board: March 24th
Survey results shared and discussed with Department Leaders:
January 30th

Survey results shared with front line staff: January 30th

During discussions with the Residents and Family councils, when sharing our 2024 results, three areas were determined to be most important priorities for us to focus on and these are included in our 2025 QIP.

Top three areas for improvement in 2025:

I am satisfied with the food and beverages served to me - 42.1 %

I am satisfied with the variety of food and beverage options - 43.8 %

I have input into the recreation programs available - 43.8 %

Our action plan has been developed with the input from Resident and Family Councils to put quality initiatives into place to address these areas of opportunity identified.

PROVIDER EXPERIENCE

Extendicare Countryside is part of a large organization in which there are many opportunities to engage with staff and leadership in sharing quality improvement goals and commitments. This is achieved through employee engagement surveys, sharing of best practices organization wide, regional quality labs and participation in the Ontario Long Term Care Association Quality Committee and annual quality forums.

Our annual employee engagement survey provides an opportunity for team members to give their feedback on various issues such as staff satisfaction, innovation, and work environment. Based on previous employee engagement results we worked this year to improve two-way communication to better engage our team members. This included the launch of two communication forums accessible to all, enabling employee access to timely information and updates from across the organization

The resulting improvements include Quarterly turnover improving from 9.6% to 6.8% across Extendicare and employee engagement increased by 6 points with almost 16,000 surveys completed

Extendicare has a nationwide Care Champion Program which celebrates the meaningful work, commitment and passion demonstrated by our dedicated team members. This program

places a spotlight on team members who go above and beyond to improve care, every day for our residents. Active team members at our long-term care homes can be nominated by our residents, family members, co-workers or managers for special recognition of the extraordinary care they provide.

To strengthen recruitment efforts, Extendicare Countryside continues to streamline the hiring process for students in various fields such as PSW programs, Nursing programs, Social Worker programs. We will continue to work in collaboration with the area colleges and universities by offering placement opportunities and posting job opportunities at the school job boards.

The home is currently looking at new strategies to improve recruitment and retention. This includes creating a mentorship program that will provide opportunities for more experienced team members to mentor new team members, answer any questions that they may have, and support their transition into their new roles. The home recognizes the importance of having an active Cultural Committee that will foster a positive and engaging work environment. Committee activities will include recognition and cultural programs that will foster inclusiveness amongst staff and professional development activities that will encourage and support personal and professional growth.

We will continue to emphasize a resident-centered approach, ensuring compassionate care remains a core focus and a source of unity for the team. The home will also invite external support and experts to assist with any of the above efforts.

SAFETY

At Extendicare, we take a system approach to preventing and reducing resident safety incidents. At the core of this approach is system learning and process improvement.

Incidents and risks are escalated rapidly within the organization, so that they can be addressed and mitigated, with rapid response support provided to home care teams by specialized organizational support team members. When a root cause from an incident in one home is identified that may pose a risk elsewhere, an alert is sent out to all care teams across our organization. These alerts flag issues and risks home leaders should be aware of, and preventative measures homes need to take in relation to care practice and risk prevention.

Safety data is analyzed continually from all Extendicare homes, to identify improvement opportunities. Standardized process, policy, practice and technology improvements are developed in response, and shared through education with care teams across all our homes. Biweekly education and question and answer webinars are held on safety and clinical practice topics derived from this analysis and attended by leaders and clinicians from all Extendicare homes throughout the year.

From front-line to senior leadership, safety incident reporting, awareness and response, is embedded in our roles and daily work. All these program elements, and more, comprise our safety culture program.

PALLIATIVE CARE

Residents and families in long-term care deserve compassionate,

high-quality care. Our teams collaborate with residents and families to tailor plans of care based on each residents' individualized needs.

Our home has a Palliative suite that families/loved ones can utilize when their loved ones area resident is at end of life. This provides family members with an opportunity to rest, take turns at the bedside, sleep and shower and freshen up in the ensuite.

We provide enhanced palliative care training for interdisciplinary teams, in partnership with Pallium Canada, enabling high-quality clinical, spiritual and emotional palliative care supports for residents and their families. In 2025 as an organization, we are training additional facilitators so we can provide ongoing educational opportunities as we continue to build a culture utilizing a palliative approach to care.

In collaboration with Pallium all Extendicare homes have a registration link to family caregiver education on palliative care. The CARERS course is available free of charge and is an excellent educational opportunity we promote for caregiver support.

We are currently updating our Palliative Program policies and procedures to further emphasize the importance of a palliative care philosophy. The revised policies and procedures will be implemented in 2025 with associated staff education and training. The focus will be on earlier awareness and identification of those who require a palliative approach to care through implementation of a standardized Palliative assessment which is designed to guide staff in addressing the holistic needs and symptom management of each resident.

POPULATION HEALTH MANAGEMENT

Extendicare Countryside considers the unique demographics in our home when planning care delivery requirements, programs, resources, and external partnerships. In our home, we serve a wide variety of residents with diverse health needs. However, our primary resident demographics are older adults with dementia, heart and lung disease and various mental health diagnoses including anxiety and depression.

One of our unique features is a dementia-friendly memory care community. The physical and social environment are designed to keep our residents safe and secure while meeting the needs of residents living with dementia and their families. Our residents and their fostering quality of life. Our Residents are understood, respected and receive supportive options that foster quality of life.

Often caregivers in the communities we serve are carrying the burden of care alone and it can be both exhausting and overwhelming. Our respite care services provide the caregiver a break so they can go on vacation or simply rest and recharge, all while feeling confident that their loved one is receiving top quality care and service while they take their much-needed break. Extendicare Countryside offers 2 respite designated beds with a maximum stay of 90 days.

We also collaborate with multiple partners:

- Health Sciences North Emergency Department Outreach Services (EDOS). Provide services in the home such as emergency lab work, IV therapy, treatments such as wound closure with Dermabond skin adhesive, education, triage residents through the ED to decrease wait time for residents who require x-rays, scans etc. Assist in preventing unnecessary ED visits.

- Behavior Support Ontario (BSO). Our embedded BSO team works with the Integrated Resource Team (IRT) and Psychogeriatric Resource Consultant (PRC) to support our residents and families living with dementia. BSO also supports our team members by providing education and training in such areas as Gentle Persuasive Techniques and Resident centered care approaches.

- Medisystems Pharmacy and their Consultants: post fall medication reviews, quarterly medication reviews, provide education to registered in house and via their medisystem client care portal, medication incident report reviews

- Achieva Health/Physiotherapist and Aides: provide such services as assessments, physical therapy programs to assist with mobility and strength training, pain management, falls prevention, pressure injury prevention and restraint reduction. The home has an Occupational Therapist who visits once weekly to complete wheelchair and walkers assessments

- Medigas: provide oxygen services, education for staff and CPR recertification.

- First Quality: provide education and training to our continence champions regarding effective continence management programs for our residents, appropriate products, review product usage and cost analysis with continence leads, education for front line staff regarding appropriate use of the products.

- Solventum: Monthly meetings with Skin and Wounds to review product used in house, discuss any barriers or challenges to wound healing, provide education to front line staff on a quarterly basis regarding the Rise program, provide a full day workshop annually for registered staff that includes an overview of the integumentary system, stages of wound healing, challenges and barriers to wound management, managing infection, and utilization of appropriate products.

- Ontario health at Home: provide information regarding Countryside to people who are preparing to move into a LTC home.
- Silver Cross - Perform equipment repairs once weekly.
- Handicare - provide lifts and equipment, repairs as needed, tubs, staff education on the use of the lifts, tubs etc.
