

Quality Improvement Plan (QIP)

Narrative for Health Care Organizations in Ontario

March 27, 2025

OVERVIEW

Extendicare Riverside Place is a long-term care home located in Windsor, Ontario and part of a large organization which provides care and services for seniors across Canada.

Improving the quality of care we provide for our residents and their families guides all we do. We are committed to continuous improvement, and on an ongoing basis, we seek new ways to evolve our practices and strengthen our services.

Read more about this in our Improving Care Plan.

Our Purpose, Mission, Vision and Values

In 2024, through broad consultation with stakeholders across our organization including direct engagement of residents, team members and family members of those in our care, Extendicare conducted a refresh of the Mission, Vision and Values. Our goals were to capture who we are, what we can all achieve working together and to put the feelings of communities into words.

Our Purpose is helping people live better.

Our Mission is to provide people with the care they need wherever they call home.

Our Vision is a future where everyone in Canada has access to the care and support, they need to live their best lives.

Our Values:

- We embrace every person for the individual they are.
- We care for each person as we would our own family.
- We collaborate with others because we achieve more together.
- We are relentless in our efforts to improve.
- We respect the resources entrusted to us.

In 2023, Revera's long-term care homes joined Extendicare. This has provided an opportunity to combine strengths, learn from one another, establish communities of practice focused on continuous improvement and collaboration, and reinforce Extendicare's deep commitment to long-term care in Canada.

Throughout our organization, integration work continues to be an important focus in 2025 and beyond. We know collaboration allows us to achieve more together. By aligning and standardizing processes, policies and systems across our homes, all Extendicare LTC homes will deliver consistent, quality care.

Quality Improvement

Extendicare's Quality Framework outlines the ways in which our home is supported to achieve success with a focus on quality of life, safety, regulatory compliance and resident engagement. In alignment with provincial requirements, each Extendicare home in the province is responsible for directing their quality improvement plan, with the support of a dedicated regional team who assist us with our home's quality initiatives. Our strategic direction and the initiatives that support the plan also meet or exceed standards set by Accreditation Canada and meet the requirements of our LSAA.

Our home's multidisciplinary Continuous Quality Improvement (CQI) Committee oversees our quality program. It is led by our home's CQI lead. Membership includes our home leadership team, each designated program lead, Medical Director, Dietitian, Pharmacy Consultant, resident council representatives, and care team representatives, including a Personal Support Worker and

Registered clinical staff. Our CQI committee meets at a minimum quarterly and uses a CQI Framework in alignment with Extendicare's enterprise-wide strategic quality priorities to identify key areas for quality improvement in our home, make recommendations, monitor and measure progress, identify and implement adjustments, and communicate improvement outcomes for the current and following year. Results are discussed and shared with residents, families, team members and external partners to support our priorities, targets, and activities.

Across our organization, Extendicare measures and monitors our quality initiatives using data accuracy and quality indicator results. Home-level quality reports are circulated monthly and reviewed by homes and regional teams across our network, to help monitor progress and drive meaningful conversation at each home's continuous quality committee meetings. Performance monitoring is a key part of our relentless efforts to improve performance and include but are not limited to the following:

- Monitoring key quality indicators
- Internal audits
- External audits
- Annual Program evaluations
- Resident and Family Experience Survey results

In 2024, our home's Quality Improvement priority areas included Falls prevention, Restraint reduction, Antipsychotic deprescribing, and Worsened pressure injury. The following top areas for improvement identified from our 2023 Resident and Family Experience survey results were also included:

Resident Satisfaction – Would recommend this home to others

Family Satisfaction – Would recommend this home to others

We are proud of the following achievements and improvements that were implemented based on the 2023 survey results and that were part of our 2024 improvement plan:

- Increased resident engagement at Resident’s Council with department updates
- New family newsletter highlighting communication and department focuses
- Maintained 0% restraints in our home. As a result, we will continue to monitor processes but have not included in 2025 workplan.

Our CQI committee has determined that for 2025 our priority areas for quality improvement in our home will include Fall prevention, Pressure injury reduction and Antipsychotic deprescribing as well as the following areas from our Resident Experience survey as determined following consultation with our Resident Council and families includes food and beverage variety, quality care from doctors and care conference process.

ACCESS AND FLOW

Extendicare is committed to working closely with our community partners including our regional Ontario Health at Home team, hospitals, and business partners to ensure safe, effective and high-quality care of residents across the organization and at the local home level. We do this through ongoing relationship building and

partnerships with health system partners such as local long-term care homes, regional IPAC hubs, Ontario Health teams and various regulatory authorities.

In addition, our partnerships extend to our Medical Advisor and Attending Physicians as we work to improve medication management, clinical care and reduce unnecessary ED visits.

We work together with residents, their families and our health system partners to ensure safe, effective admissions to our home, and understand transitions throughout the system are not easy for those we serve. We work to apply additional care and attention to closely engage and support those in our care at times of change or at times where specialized supports are required in their health care journey.

Prevention and health promotion

Throughout the year, we support and participate in organization-wide awareness campaigns that educate team members, residents and families. Our home has access to an annual awareness calendar that highlights key health promotion and professional recognition events, which are supported nationally through communication and education, and locally at our home with activities that are tailored to the home’s needs and demographics. Organization-wide campaigns include:

- Safe Spaces: Combining four key autumn safety awareness events – Infection Control Week, Canadian Patient Safety Week, Seniors’ Safety Week, and Fall Prevention Month – Safe Spaces is a six-week sustained safety campaign. Aimed at promoting a culture of safety

across the organization through education, resources and home-level activities, the campaign equips our team members with knowledge and tools to continuously improve quality and safety and engages residents and families as partners in care.

- **Stick it to the flu:** Through Extendicare's annual influenza vaccination campaign, all homes are encouraged to aim for 90% vaccination of residents and staff. Individual and home-wide incentives are provided for achieving this benchmark, and our home hosts on-site vaccination clinics.

- **Hand Hygiene Day:** Led by our IPAC team, this annual day is marked with an intensive focus on tools and education to promote proper hand hygiene practices for team members, residents and families. Homes across Extendicare participate in a friendly challenge to find the most creative and engaging ways to promote hand hygiene – from writing jingles to hosting events.

- **Alzheimer's awareness:** We care for a population that is impacted by rising rates of Alzheimer's and dementia. In addition to intensive communication focus during Alzheimer's Awareness Month every January, our home has access to tools and education year-round that helps our team members to tailor care to the unique needs of those living with dementia – from Gentle Persuasive Approaches (GPA) training to dementia-focused tools for skin and wound care.

Right care in the right place at the right time

On an ongoing basis, we work hard to support, train, retain and recruit qualified and compassionate team members to work together in the service of quality care for residents. We know strong interdisciplinary teams are essential to the delivery of quality care and we foster a culture of collaboration to contribute coordinated expertise, as resident plans of care are executed. In

addition, we are actively recruiting Nurse Practitioners to support our collaborative models of care, continue to invest in building credentials among our team for advanced wound nurses (SWAN's), provide training and resources for our team to enhance skillsets in IV therapy with multi-venous IV training arms, compassionate end-of-life care and more.

Building capacity

We recognize how important long-term care is within our health system. At an enterprise-wide level, Extendicare is actively working to increase access to care through the construction of new homes built to modern design standards with the ability to welcome more people on the province's long-term care waiting list. In communities across the province, Extendicare is building for the future, with plans to redevelop every older home in our network. New homes are designed to deliver significant improvements to resident quality of life, with private bedrooms for all, enhanced communal lounges for activities and family visits, increases in space for restorative therapies and more.

EQUITY AND INDIGENOUS HEALTH

Extendicare is committed to improving equitable access, experience and outcomes to reduce health inequities and advance indigenous health across our organization.

At Extendicare, we embrace every resident for the individual they are, and care for them as we would our own family. Our Equity and Indigenous Health program reflects our core values by recognizing and honouring the diverse identities, cultures, and experiences of each resident. By integrating culturally appropriate care and

Indigenous traditions, we affirm the importance of personal heritage in shaping well-being. Through culturally diverse programming, menu selection, staff education and meaningful community partnerships, we create a safe and inclusive environment where residents feel valued, respected and empowered to be their authentic selves. This commitment is essential to providing compassionate and equitable care.

Our Equity and Indigenous Health program is informed by our Resident Council and families, and by the data we gather from our annual Resident and Family Experience Survey. Through partnerships with local Indigenous Elders, Knowledge Keepers, and regional health organizations we are able to integrate healing practices and culturally significant activities into care plans. Personalized support ensures residents feel seen, respected and connected to their heritage.

Implementing mandatory training on cultural safety, anti-racism, and the history of Indigenous Peoples in Canada for all staff, fosters awareness and equips caregivers with the skills to address systemic barriers and biases. Identifying and addressing systemic gaps in care, including access to interpreters, culturally appropriate meals and resources, and the provision of trauma-informed care, are skills taught in staff training. Regularly assessing program outcomes through resident feedback, and staff input, helps us ensure continuous improvement

Some examples of programs we have implemented include Manager training for Equity, Diversity and Indigenous Rights. In 2025 we commit to continued support and recognition for diversity and inclusion for staff, residents and families in our home

PATIENT/CLIENT/RESIDENT EXPERIENCE

Active engagement of residents and families is essential to our values. Annually, through an anonymous survey, we seek feedback from residents and their families about what is going well and what we can do to improve. The annual survey provides our home with a summary of the scores and comments for each of the areas of care and services offered. We use this report to collaborate with the resident council and families to determine an action plan to improve the experiences of those we serve. On a regular basis during the year, we discuss progress updates and strategies for improvement via town halls, resident council and family meetings and newsletters.

Our ongoing goal is to incorporate feedback to continually improve the quality of care we provide by ensuring the care each resident receives is reflective of their individual needs and wishes.

Extendicare is proud to have a National REACH (Resident Experience Action Council for Homes) comprised of resident and family representatives from our long-term care homes in each province we serve. The council is co-led by resident and family members and provides valuable input on organizational initiatives and decisions. A head-office supported community of practice meeting is held bimonthly and is open to all residents and families interested in sharing best practices and learning new ways to approach engagement, co-design, and council roles and responsibilities.

Our 2024 Resident and Family Experience Survey Results:
Date of 2024 Annual Resident and Family Experience Survey:
September 3 – October 11, 2024

Resident: Would you recommend this home? 73.9%

Family: Would you recommend this home? 81%

Survey results were reviewed by CQI committee: Nov 27, 2024

Survey results were shared and discussed with Resident Council:
Nov 12, 2024

A copy of the survey results was provided to Resident Council: Nov
12, 2025

Survey results were posted for review by family members on our
bulletin board: Nov 26, 2024

We currently do not have a Family council in our home. We
continue to try and recruit members through newsletters, family
town halls and posting information about family council.

Survey results shared with staff in the home: Nov 26, 2024

During discussions with the Residents council when sharing our
2024 results, three areas were determined to be most important
priorities for us to focus on and these are included in our 2025 QIP.

Top three areas Resident Experience survey priorities for
improvement in 2025:

1. Satisfied with variety of food and beverage options 52.2%

A summary of recommendations and actions to take place include:

- Continue with monthly food committee beginning
- Installation of new menu boards in each home area

2. Satisfied with quality of care from doctors 53.3%

A summary of recommendations and actions to take place include:

- Staff member accompanying doctor to resident rooms to assist
with resident understanding
- Name tag for doctors so residents understand who they are
talking to

- Ensuring doctor visits occur in resident rooms or in private not in
dining room or hallway

3. In my care conference, we discuss what's going well, what could
be better and how we can improve things 54.8%:

A summary of recommendations and actions to take place include:

- Ensuring care conference invitations are provided to residents in
addition to those send to family / POA
- If no family is available, have a process for a staff member to offer
to bring resident to care conference if they wish.

PROVIDER EXPERIENCE

Riverside Place is part of a large organization in which there are
many opportunities to engage with staff and leadership in sharing
quality improvement goals and commitments. This is achieved
through employee engagement surveys, sharing of best practices
organization wide, regional quality labs and participation in the
Ontario Long Term Care Association Quality Committee and annual
quality forums.

Our annual employee engagement survey provides an opportunity
for team members to give their feedback on various issues such as
staff satisfaction, innovation, and work environment. Based on
previous employee engagement results we worked this year to
improve two-way communication to better engage our team
members. This included the launch of two communication forums
accessible to all, enabling employee access to timely information
and updates from across the organization.

The resulting improvements include Quarterly turnover improving
from 9.6% to 6.8% across Extendicare and employee engagement

increased by 6 points with almost 16,000 surveys completed.

Extendicare has a nationwide Care Champion Program which celebrates the meaningful work, commitment and passion demonstrated by our dedicated team members. This program places a spotlight on team members who go above and beyond to improve care, every day for our residents. Active team members at our long-term care homes can be nominated by our residents, family members, co-workers or managers for special recognition of the extraordinary care they provide.

Riverside Place has maintained a successful partnership with local PSW training schools as a preferred teaching home for initial placement and preceptorships sessions. These partnerships were strengthened through the pandemic and continue to this day. The home draws primarily from its student placement pool for new hires, a practice that ensures a regular and stable staffing level dating back many years. We engage our preceptors for feedback on potential new hires from this student placement pool, ensuring that this collaboration with our front-line team will make new hires successful in their transition from PSW student to employment as a PSW. This practice has greatly reduced turnover for new hires and contributed to the success of the home's staffing. Riverside Place has not used agency staffing for PSW positions at any time, maintaining a sufficient part time staff to prevent agency usage from occurring.

SAFETY

At Extendicare, we take a system approach to preventing and reducing resident safety incidents. At the core of this approach is system learning and process improvement.

Incidents and risks are escalated rapidly within the organization, so that they can be addressed and mitigated, with rapid response support provided to home care teams by specialized organizational support team members. When a root cause from an incident in one home is identified that may pose a risk elsewhere, an alert is sent out to all care teams across our organization. These alerts flag issues and risks home leaders should be aware of, and preventative measures homes need to take in relation to care practice and risk prevention.

Safety data is analyzed continually from all Extendicare homes, to identify improvement opportunities. Standardized process, policy, practice and technology improvements are developed in response, and shared through education with care teams across all our homes. Biweekly education and question and answer (Q&A) webinars are held on safety and clinical practice topics derived from this analysis and attended by leaders and clinicians from all Extendicare homes throughout the year.

From front-line to senior leadership, safety incident reporting, awareness and response, is embedded in our roles and daily work. All these program elements, and more, comprise our safety culture program.

PALLIATIVE CARE

Residents and families in long-term care deserve compassionate, high-quality care. Our teams collaborate with residents and families to tailor plans of care based on each residents' individualized needs.

We provide enhanced palliative care training for interdisciplinary teams, in partnership with Pallium Canada, enabling high-quality clinical, spiritual and emotional palliative care supports for residents and their families. In 2025 as an organization, we are training additional facilitators so we can provide ongoing educational opportunities as we continue to build a culture utilizing a palliative approach to care.

In collaboration with Pallium all Extendicare homes have a registration link to family caregiver education on palliative care. The CARERS course is available free of charge and is an excellent educational opportunity we promote for caregiver support.

We are currently updating our Palliative Program policies and procedures to further emphasize the importance of a palliative care philosophy. The revised policies and procedures will be implemented in 2025 with associated staff education and training. The focus will be on earlier awareness and identification of those who require a palliative approach to care through implementation of a standardized Palliative assessment which is designed to guide staff in addressing the holistic needs and symptom management of each resident.

POPULATION HEALTH MANAGEMENT

Extendicare Riverside Place considers the unique demographics in our home when planning care delivery requirements, programs, resources and external partnerships. A change in our resident population over the past few years has seen an increasing number of residents under the age of 80 with different needs than our historical resident population. To address these changes, we have implemented new programs over the past year such as enhanced restorative care including adding new restorative equipment. We have also added variety of new activities and recreation strategies including an accessible outdoor recreation space for residents.
