1. **GENERAL INFORMATION AND NATURE OF THE BUSINESS**  
The common shares (the “Common Shares”) of Extendicare Inc. (“Extendicare” or the “Company”) are listed on the Toronto Stock Exchange (TSX) under the symbol “EXE”. Extendicare and its predecessors have been operating since 1968, providing care and services to seniors throughout Canada. Following the sale of its U.S. business in 2015, the Company has repositioned itself as a leading provider of care and services across Canada, committed to delivering quality care throughout the health continuum to meet the needs of a growing seniors population.

References to “Extendicare”, the “Company”, “we”, “us” and “our” or similar terms refer to Extendicare Inc., either alone, or together with its subsidiaries. The registered office of Extendicare is located at 3000 Steeles Avenue East, Suite 700, Markham, Ontario, Canada, L3R 9W2.

2. **BASIS OF PREPARATION**

a) **Statement of Compliance**

The interim condensed consolidated financial statements have been prepared in accordance with International Accounting Standards (IAS) 34 “Interim Financial Reporting”, as issued by the International Accounting Standards Board (IASB), and were approved by the board of directors of Extendicare Inc. (the “Board”) on May 14, 2019.

The interim condensed consolidated financial statements do not include all of the information required for full annual financial statements, and should be read in conjunction with Extendicare Inc.’s 2018 annual consolidated financial statements prepared in accordance with International Financial Reporting Standards (IFRS). These interim condensed consolidated financial statements follow the same accounting policies and methods of application as the consolidated financial statements as at and for the year ended December 31, 2018, except for those identified in note 3. Certain comparative information has been reclassified to conform to the current year presentation.

b) **Basis of Measurement**

The interim condensed consolidated financial statements have been prepared on the historical cost basis except for financial assets and liabilities classified at fair value through profit or loss.

The interim condensed consolidated financial statements are presented in Canadian dollars, which is the Company’s functional currency. All financial information presented in dollars has been rounded to the nearest thousand, unless otherwise noted.

c) **Use of Estimates and Judgement**

The preparation of consolidated financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, disclosures of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenue and expenses during the reporting period. Estimates and underlying assumptions are reviewed on an ongoing basis.

Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

The more subjective of such estimates are:

- determination of the lease term for leases that include renewal options and the appropriate discount rate used to recognize lease liability (note 3);
- valuation of indemnification provisions (note 6);
- valuation of self-insured liabilities (note 6);
- valuation of equity portion of convertible debentures;
- valuation of financial assets and liabilities (note 17(b));
- valuation of share-based compensation (note 9);
- determination of the recoverable amount of cash generating units (CGUs) subject to an impairment test; and
- accounting for tax uncertainties and the tax rates used for valuation of deferred taxes.
In addition, the assessment of contingencies (note 16) is subject to judgement. The recorded amounts for such items are based on management’s best available information and are subject to assumptions and judgement, which may change as time progresses; accordingly, actual results could differ from estimates.

3. NEW ACCOUNTING POLICIES ADOPTED

Leases

Effective January 1, 2019, the Company adopted IFRS 16 “Leases”, which supersedes IAS 17 “Leases” and related interpretations. This new standard requires a lessee to recognize assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value, using a single accounting model, thereby eliminating the distinction between operating and finance leases. The nature and timing of the related expense has changed as IFRS 16 replaces the straight-line lease costs with a depreciation charge for right-of-use assets and interest expense on lease liabilities.

Lease costs for the prior year have been reclassified under administrative costs to conform with the current year presentation. The impact of adopting this standard on net earnings and overall cash flow is neutral; however, the principal payment of the lease liabilities is presented in financing activities (previously reflected as operating activities).

The Company has applied IFRS 16 using the modified retrospective approach, under which the comparative information presented has not been restated. Certain practical expedients were selected on transition. The transition did not result in any retrospective adjustment to opening retained earnings on January 1, 2019.

TRANSITION

At transition, for leases classified as operating leases under IAS 17, lease liabilities were measured at the present value of the remaining lease payments, discounted at the Company’s incremental weighted average borrowing rate as at January 1, 2019, of 4.86%. Right-of-use assets were measured at an amount equal to the lease liability. For leases that were classified as finance leases under IAS 17, the carrying amount of the right-of-use assets and the lease liability as at January 1, 2019, was the carrying amount of the lease assets and lease liability immediately before the date of initial application. These are accounted for using IFRS 16 from that date.

The Company used the following practical expedients when applying IFRS 16 to leases previously classified as operating leases under IAS 17:

- applied the exemption not to recognize right-of-use assets and liabilities for leases with less than 12 months of lease term;
- applied the exemption not to recognize right-of-use assets and liabilities for leases that are of low value;
- excluded initial direct costs from measuring the right-of-use asset as at January 1, 2019; and
- used hindsight as at January 1, 2019, when determining the lease term if the contract contains options to extend or terminate the lease.

IMPACTS ON FINANCIAL STATEMENTS

i. Impacts on transition

On transition to IFRS 16, the Company recognized additional right-of-use assets and lease liabilities of $5.8 million.

ii. Impacts for the period

For the three months ended March 31, 2019, the Company recognized $0.7 million of depreciation expense and $0.1 million of interest expense related to the leases impacted by the adoption of IFRS 16.

Income Taxes

On June 7, 2017, the IASB issued IFRIC Interpretation 23 “Uncertainty over Income Tax Treatments”. The interpretation provides guidance on the accounting for current and deferred tax liabilities and assets in circumstances in which there is uncertainty over income tax treatments. Effective January 1, 2019, the Company adopted the IFRIC Interpretation 23, with no material impact on the interim condensed consolidated financial statements.
4. PROPERTY AND EQUIPMENT

<table>

Investments Held for Self-insured Liabilities

After the sale of our U.S. business in 2015 (the “U.S. Sale Transaction”), as part of its continuing operations, Extendicare retained its wholly owned Bermuda-based captive insurance company, Laurier Indemnity Company, Ltd. (the “Captive”), which, along with third-party insurers, insured Extendicare’s U.S. general and professional liability risks up to the date of the U.S. Sale Transaction.

Extendicare holds U.S. dollar-denominated investments within the Captive for settlements of the self-insured liabilities that are subject to insurance regulatory requirements (note 6).

As at March 31, 2019, the investment portfolio comprises cash of $3.2 million (December 31, 2018 – $5.8 million), money market funds of $55.5 million (December 31, 2018 – $53.8 million), and no investment-grade corporate securities (December 31, 2018 – $8.3 million). Certain of these investments in the amount of $24.0 million (December 31, 2018 – $35.1 million), have been pledged as collateral for letters of credit issued by the banker of the Captive in favour of ceding companies. As at March 31, 2019, all investments were carried at fair value, with changes in fair value reflected in earnings (note 13).

Amounts Receivable and Other Assets

Amounts receivable and other assets include discounted amounts receivable due from the government of Ontario with respect to construction funding subsidies for long-term care centres, totalling $52.0 million (December 31, 2018 – $53.3 million) of which $5.6 million (December 31, 2018 – $5.5 million) is current. These subsidies represent funding for a portion of long-term care centre construction costs over a 20-year or 25-year period. The weighted average remaining term of this funding is 15 years.

Also included in amounts receivable and other assets is a $1.4 million receivable as at March 31, 2019 (December 31, 2018 – $2.0 million), resulting from the U.S. Sale Transaction, as well as prepaid expenses and deposits.
Interest Rate Swaps

The interest rate swaps include swap contracts relating to mortgages, totalling $84.2 million, to lock in the rates between 3.11% and 5.04% for the full term of the loans being five to ten years (note 7).

All interest rate swap contracts are measured at fair value through profit or loss, and hedge accounting has not been applied. Changes in fair value are recorded in the statements of earnings (note 13). As at March 31, 2019, the interest rate swaps were valued as a net asset of $0.7 million, including a liability of $0.8 million (notes 7 and 8) (December 31, 2018 – net asset of $2.0 million, including a liability of $0.5 million).

Accrual for Self-Insured Liabilities

The obligation to settle U.S. self-insured general and professional liability claims relating to the period prior to the closing of the U.S. Sale Transaction, including claims incurred but yet to be reported, remains with Extendicare, which it intends to fund through the Captive. Consequently, the balance of the accrual for self-insured liabilities and the related investments held for self-insured liabilities (note 5) remain on the consolidated statement of financial position. However, any expense incurred or release of reserves for U.S. self-insured liabilities are presented as discontinued operations; while the Captive’s costs to administer and manage the settlement of the remaining claims are reported as continuing operations within the U.S. segment.

The accrual for self-insured liabilities is based on management’s best estimate of the ultimate cost to resolve general and professional liability claims. Actual results can differ materially from the estimates made due to a number of factors including the assumptions used by management and other market forces.

As at March 31, 2019, the accrual for self-insured general and professional liabilities was $25.7 million (US$19.3 million) compared to $37.1 million (US$27.2 million) as at December 31, 2018. The decline represented mainly claim payments and the release of reserves (note 15).

Indemnification Provisions

As a result of the U.S. Sale Transaction, the Company agreed to indemnify certain obligations of the U.S. operations related to tax, a corporate integrity agreement (the “CIA”), and other items. Any revisions to these estimates are reflected as part of other expense in discontinued operations (note 15). As at March 31, 2019, the remaining provisions totalled $12.8 million (US$9.6 million) (2018 – $13.7 million or US$10.1 million). Actual results can differ materially from the estimates made due to a number of factors including the assumptions used by management and other market forces.

Decommissioning Provisions

The decommissioning provisions relate to possible asbestos remediation of Extendicare’s pre-1980 constructed centres. An estimated undiscounted cash flow amount of approximately $11.0 million was discounted using a rate of 1.98% over an estimated time to settle of 7 years. This represents management’s best estimate and actual amounts may differ.

Deferred financing costs (8,031) (8,416)

Total debt, net of deferred financing costs 532,796 528,970

Less: current portion 81,303 74,626

Long-term debt, net of deferred financing costs 451,493 454,344

A summary of significant changes in long-term debt since December 31, 2018, is provided below.

CMHC Mortgages

Subsequent to March 31, 2019, the Company secured a CMHC-insured mortgage of $16.0 million, inclusive of fees, on the Lynde Creek Manor retirement living community, that matures in September 2029, with a fixed rate of 2.81% per annum.

Construction Loans

Construction financings totalling $87.6 million for four retirement development projects in Simcoe, Bolton, Uxbridge, and Barrie are available and provide for additional letter of credit facilities of $0.5 million, $0.8 million, $0.8 million, and $1.0 million respectively, at rates ranging from 2.25% to 2.5% if utilized. Loan payments are interest-only based on a variable rate of 30-day banker’s acceptance (BA) plus 2.25% to 2.5%, with no standby fee.

The construction loans are repayable on demand and, in any event, are to be fully repaid: by the earlier of achieving stabilized occupancy as defined by the agreements and specified dates between late 2019 and 2022 for Simcoe, Bolton and Uxbridge; and by the earlier of September 2023 and three months following stabilized occupancy as defined by the agreement for Barrie.

All these financings have been reflected as current. Permanent financing for each of the communities will be sought upon maturity of the construction financing.

As at March 31, 2019, an aggregate of $58.0 million was drawn on the construction loans, leaving $29.6 million available; in addition, letters of credit totalling $1.2 million were issued under credit facilities, leaving $1.8 million undrawn.

Lease Obligations

Lease obligations outstanding as at March 31, 2019 include leases on long-term care centres, customized cloud-based software, and the liability related to office leases (note 3). The Company operates nine Ontario long-term care centres, which were built between 2001 and 2003, under 25-year lease arrangements. The software balance will be amortized over the contract term of five years. The liability associated with the office lease obligation will be amortized over the remaining lease terms ranging up to five years.

Credit Facilities

The Company has two demand credit facilities totalling $112.3 million, secured by either 13 Class C long-term care centres in Ontario or the assets of the home health care business. Neither of these facilities has financial covenants, but do contain normal and customary terms. As at March 31, 2019, $38.0 million of the facilities secure the Company’s defined benefit pension plan obligations, $7.0 million was issued in connection with obligations relating to centres that were recently acquired and under development, leaving $67.3 million undrawn.

Deferred Financing Costs

Deferred financing costs are deducted against long-term debt and are amortized using the effective interest rate method over the term of the debt.
Below is a summary of the deferred financing costs:

<table>

</table>

**Interest Rates**

The weighted average interest rate of all long-term debt as at March 31, 2019, was approximately 4.8% (December 31, 2018 – 4.9%). As at March 31, 2019, 89.3% of the long-term debt, including interest rate swaps, was at fixed rates (December 31, 2018 – 90.2%).

**8. OTHER LONG-TERM LIABILITIES**

<table>

</tbody>
</table>

**9. SHARE-BASED COMPENSATION**

The Company’s share-based compensation, which includes deferred share units (DSUs) and performance share units (PSUs), and prior to 2019, share appreciation rights (SARs) was an expense of $0.2 million for 2019 (2018 – $0.4 million).

The carrying amounts of the Company’s share-based compensation arrangements are recorded in the consolidated statements of financial position as follows:

<table>
<thead>
<tr>

<td>792</td>
</tr>
</tbody>
</table>

**Equity-settled Long-term Incentive Plan**

The Company’s long-term incentive plan (the “LTIP”) provides for a share-based component of executive and director compensation designed to encourage a greater alignment of the interests of the Company’s executives and directors with its shareholders, in the form of PSUs for employees and DSUs for non-employee directors.

PSUs and DSUs granted under the LTIP do not carry any voting rights. DSUs vest immediately upon grant and PSUs vest three years from the date of grant. An aggregate of 4,387,974 Common Shares are reserved and available for issuance pursuant to the LTIP.
A summary of the Company’s DSU and PSU activity is as follows:

<table>

</tbody>
</table>

The grant date values of PSUs awarded were based on the fair values of one award comprised of two equal components being the adjusted funds from operations (AFFO) and total shareholder return (TSR). The fair values of the AFFO component were measured using the previous day’s closing trading price of the Common Shares. The fair values of the TSR component were measured using the Monte Carlo simulation method.

A summary of PSUs granted and the assumptions used to determine the grant date values are as follows:

10. SHARE CAPITAL

Dividend Reinvestment Plan

The Company has a Dividend Reinvestment Plan (DRIP) pursuant to which shareholders who are Canadian residents may elect to reinvest their cash distributions in additional Common Shares. During the three months ended March 31, 2019, the Company issued 183,762 Common Shares at a value of $1.3 million in connection with the DRIP (2018 – 143,581 Common Shares at a value of $1.2 million).

Normal Course Issuer Bid

In January 2019, Extendicare received the approval of the TSX to renew its normal course issuer bid (the “Bid”) to purchase for cancellation up to 8,830,000 Common Shares (approximately 10% of the public float) through the facilities of the TSX, and on alternative Canadian trading platforms. The Bid commenced on January 15, 2019, and provides Extendicare with flexibility to purchase Common Shares for cancellation until January 14, 2020, or on such earlier date as the Bid is complete. Subject to the TSX’s block purchase exception, on any trading day, purchases under the Bid will not exceed 54,852 Common Shares. The price that Extendicare will pay for any Common Shares purchased under the Bid will be the prevailing market price at the time of purchase and any Common Shares purchased will be cancelled.

During the three months ended March 31, 2019, the Company did not purchase any Common Shares under the Bid. During the three months ended March 31, 2018, under the normal course issuer bid that commenced on January 15, 2018 and ended on January 14, 2019, the Company acquired and cancelled 703,585 Common Shares at an average price of $8.89 per share, for a total cost of $6.3 million.

</tr>
<tr>
<td></td>
<td>1,429</td>
</tr>
</tbody>
</table>

On March 13, 2019, the Company received notice from Fraser Health and Vancouver Coastal Health, both regional health authorities in British Columbia (the “Health Authorities”), that the Health Authorities will be bringing their home support services in-house, and as a result will not be renewing contracts with private sector home support agencies, including ParaMed Inc. (ParaMed), the Company’s home health care operations. Consequently, ParaMed’s contracts with the B.C. Health Authorities will expire in March 2020. The Company recognized a $1.4 million provision in the first quarter of 2019 for costs to be incurred in connection with the contract expiration.

In April 2018, the Company acquired the Lynde Creek Retirement Community, and incurred transaction costs of $0.2 million during the three months ended March 31, 2018.

13. FOREIGN EXCHANGE AND FAIR VALUE ADJUSTMENTS

Foreign exchange and fair value adjustments for the three months ended March 31, 2019, was a loss of $0.3 million for 2019 (2018 – gain of $0.1 million). These include: (1) foreign exchange gains or losses related to balances in connection with the U.S. Sale Transaction that are denominated in U.S. dollars; (2) fair value adjustments to interest rate swap contracts that lock in the interest rates for certain mortgages (notes 5 and 8); and (3) fair value adjustments on investments held for self-insured liabilities (note 5).

14. EARNINGS PER SHARE

Basic earnings per share (EPS) is calculated by dividing the net earnings for the period by the weighted average number of shares outstanding during the period, including vested DSUs awarded that have not settled. Diluted EPS is calculated by adjusting the net earnings and the weighted average number of shares outstanding for the effects of all dilutive instruments. The Company’s potentially dilutive instruments include the convertible debentures and equity-settled compensation arrangements. The number of shares included with respect to the PSUs is computed using the treasury stock method. The convertible debentures and equity-settled compensation arrangements would be antidilutive and as such, these are not included in the calculation of diluted EPS.
The following table reconciles the numerator and denominator of the basic and diluted earnings per share computation.

**15. DISCONTINUED OPERATIONS**

Earnings from discontinued operations for the three months ended March 31, 2019, included the release of a portion of the accrual for self-insured liabilities of $1.9 million (US$1.4 million). For the three months ended March 31, 2018, an adjustment of $1.3 million (US$1.0 million) related to the discount rate applied, reducing the accrual for self-insured liabilities.

**16. COMMITMENTS AND CONTINGENCIES**

**Property and Equipment Commitments**

The Company has outstanding commitments of $12.4 million at March 31, 2019, in connection with private-pay retirement communities under development in Ontario, which will be substantially financed with a combination of construction financing and cash on hand. These are expected to be incurred over the next year.

**Legal Proceedings and Regulatory Actions**

Extendicare and its consolidated subsidiaries are defendants in various actions and proceedings that are brought against them from time to time in connection with their operations.

As previously disclosed, in April 2018, the Company was served with a statement of claim alleging negligence by the Company in the operation of its long-term care centres and its provision of care to residents and seeking $150.0 million in damages. The claim sought an order certifying the claim as a class action pursuant to the *Class Proceedings Act* (Ontario). By order of the Ontario Superior Court of Justice, a request from the plaintiff for discontinuance of the class proceeding was approved on October 25, 2018. Following the discontinuance, the plaintiff who commenced the class proceeding still
has the option to pursue a claim on her own behalf while others may also do so separately on their own behalf. The Company intends to defend itself against any and all such individual claims and does not believe the outcome on any or all such claims would have a material adverse impact on its business, results of operations or financial condition and in any event believes that any potential liability would be resolved within the limits of its insurance coverage.

On September 19, 2018, the Company was served with a statement of claim that seeks an order certifying the claim as a class action pursuant to the Class Proceedings Act (Ontario). The claim alleges that the Company failed to properly apply certain required medical equipment sterilization protocols at one or more of its home health care clinics and seeks $20.0 million in damages. The Company does not believe that the lawsuit or the damages sought have merit. The Company intends to vigorously defend itself against the claim and does not believe the outcome will have a material adverse impact on its business, results of operations or financial condition and in any event believes that any potential liability would be resolved within the limits of its insurance coverage.

The provision of health care services is subject to complex government regulations. Every effort is made by the Company to prevent deficiencies in the quality of patient care through quality assurance strategies and to remedy any such deficiencies cited by government inspections within any applicable prescribed time period. Extendicare accrues for costs that may result from investigations (or any possible related litigation) to the extent that an outflow of funds is probable and a reliable estimate of the amount of the associated costs can be made.

17. MANAGEMENT OF RISKS AND FINANCIAL INSTRUMENTS

(a) Management of Risks

LIQUIDITY RISK

Liquidity risk is the risk that the Company will encounter difficulty in meeting its contractual obligations. We manage our liquidity risk through the use of budgets and forecasts. Cash requirements are monitored regularly based on actual financial results and actual cash flows to ensure that there are sufficient resources to meet operational requirements. In addition, since there is a risk that current borrowings and long-term debt may not be refinanced or may not be refinanced on as favourable terms or with interest rates as favourable as those of the existing debt, we attempt to appropriately structure the timing of contractual long-term debt renewal obligations and exposures. In April 2018, the Company successfully refinanced the 2019 Debentures by issuing a new series of 2025 debentures.

In addition to cash generated from its operations and cash on hand, the Company has available undrawn credit facilities totalling $67.3 million (note 7).

CURRENCY RISK

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Cross-border transactions are subject to exchange rate fluctuations that may result in realized gains or losses as and when payments are made.

As a result of the U.S. Sale Transaction, our exposure to foreign currency risk has been significantly reduced. The following table outlines the net asset exposure to both the U.S. continuing operations and other items retained from the U.S. Sale Transaction as at March 31, 2019.

INTEREST RATE RISK

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

To mitigate interest rate risk, the Company’s long-term care debt portfolio includes fixed-rate debt and variable-rate debt with interest rate swaps in place. At March 31, 2019, construction loans of $58.0 million are variable-rate debt, which do not have interest rate swaps in place. The Company’s credit facility, and future borrowings, may be at variable rates which would expose the Company to the risk of interest rate volatility (note 7).

Although the majority of the Company’s long-term debt is effectively at fixed rates, there can be no assurance that as debt matures, renewal rates will not significantly impact future income and cash flow. The Company does not account for any fixed-rate liabilities at FVTPL; consequently, changes in interest rates have no impact on our fixed-rate debt and therefore, would not impact net earnings.

Below is the interest rate profile of our interest-bearing financial instruments, which reflects the impact of the interest rate swaps (notes 5, 8 and 13):

<table>
<thead>
<tr>
<th>Carrying Amount</th>
<th>March 31, 2019</th>
<th>December 31, 2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fixed-rate instruments:</td>
<td></td>

<tr>
<td>Total liability in variable-rate instruments</td>
<td>58,049</td>
<td>52,866</td>
</tr>
</tbody>
</table>

(1) Includes current portion and excludes netting of deferred financing costs.

Fair Value Sensitivity Analysis for Variable-rate Instruments

All long-term debt with variable rates are classified as other financial liabilities, which are measured at amortized cost using the effective interest method of amortization; therefore, changes in interest rates would not affect OCI or net earnings with respect to variable-rate debt. As at March 31, 2019, long-term debt with variable rates represented 10.7% of total debt. The value of the interest rate swaps is subject to fluctuations in interest rates, changes in fair value of these swaps are recognized in net earnings (notes 5 and 13).

Cash Flow Sensitivity Analysis for Variable-rate Instruments

An increase of 100 basis points in interest rates would have decreased net earnings by $0.1 million and a decrease of 100 basis points in interest rates would have increased net earnings by $0.1 million. This analysis assumes that all other variables, in particular foreign currency rates, remains constant, and excludes variable interest rate debt that is locked in through interest rate swaps.

(3) Includes current portion.
(4) Excludes netting of deferred financing costs.

**BASIS FOR DETERMINING FAIR VALUES**

The following summarizes the significant methods and assumptions used in estimating the fair values of financial instruments reflected in the previous table.

Fair values for investments designated as FVTPL are based on quoted market prices. Accounts receivable are recorded at amortized cost. The carrying values of accounts receivable approximate fair values due to their short-term maturities, with the exception of the amounts receivable due from government of Ontario, which are valued at discounted future cash flows using current applicable rates for similar instruments of comparable maturity and credit quality (note 5). The fair values of convertible debentures are based on the closing price of the publicly traded convertible debentures on each reporting date, and the fair values of mortgages and other debt are estimated based on discounted future cash flows using discount rates that reflect current market conditions for instruments with similar terms and risks.
FAIR VALUE HIERARCHY

We use a fair value hierarchy to categorize the type of valuation techniques from which fair values are derived: Level 1 – use of quoted market prices; Level 2 – internal models using observable market information as inputs; and Level 3 – internal models without observable market information as inputs.

The fair value hierarchy for the fair values of financial instruments where carrying value is not a reasonable approximation of fair value, are indicated above.

18. SEGMENTED INFORMATION

The Company reports the following segments: i) long-term care; ii) retirement living; iii) home health care; iv) management, consulting and group purchasing as “other Canadian operations”; and v) the Canadian corporate functions and any intersegment eliminations as “corporate Canada”. The continuing U.S. operations consist of the Captive.

The long-term care segment represents the 58 long-term care centres that the Company owns and operates in Canada. The retirement living segment includes seven acquired retirement communities, and three communities that were constructed. The retirement communities provide accommodation and services to private-pay residents at rates set by Extendicare based on the services provided and market conditions. Through our wholly owned subsidiary ParaMed, ParaMed’s home health care operations provide complex nursing care, occupational, physical and speech therapy, and assistance with daily activities to accommodate those living at home.

The Company’s other Canadian operations are composed of its contract operations management, consulting and group purchasing operations. Through our Extendicare Assist division, we provide management and consulting services to third-party owners; and through our SGP Purchasing Partner Network division, we offer cost-effective purchasing contracts to other senior care providers for food, capital equipment, furnishings, cleaning and nursing supplies, and office products.

The Company continues to group its former and remaining U.S. operations as one segment. The Captive’s expense incurred for self-insured liabilities related to the Company’s U.S. general and professional liability risks up to the date of the U.S. Sale Transaction as well as the disposed U.S. businesses are presented as discontinued operations; while the Captive’s costs to administer and manage the settlement of the remaining claims are reported as continuing operations within the U.S. segment.
